UPSTREAM OIL & GAS

PT PP Energi conducts its upstream operation activities to help equally distribute the energy solution needed in the aforementioned developing regions, also invests on a cutting-edge technology solution to increase the success rate of the development of the oil and gas fields.

As a subsidiary of state-owned company PT PP (Persero) Tbk, PT PP Energi is open to every business cooperation opportunity, with other companies in energy sector along with prospective private companies to deliver energy solution for Indonesia.

In accordance with PT PP Energi corporation strategies to strengthen its competitiveness, portability, sustainability, and looking forward to successfully carry on the operational activities while upholding the highest QHSE standards.

In 2018, PT PP Energi acquired PT Odira Energi Karang Agung (PT OEKA) from Ministry of Energy and Mineral Resources of Indonesia. This achievement stated the first milestone in Oil and Gas Upstream Project and committed to increase the production up to 1,000 BOPD.

PT ODIRA ENERGY KARANG AGUNG
PRODUCING OIL FIELD | UP TO 200 BOPD

DOWNSTREAM OIL & GAS

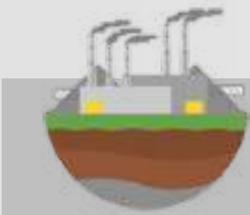

Currently, PT PP Energi is emerging as a better organization armed by knowledge of expertise, they had learned in how to doing business in downstream oil and gas. Our target is to create sustainable and renewable energy as a solution for the future also provides energy for all as our commitment for consumer's satisfaction.

In 2018, we developed Nipa Storage Tank Terminal under PT Surya Mina Bunkerindo established on 34 hectares of land located on Nipa Island, Malacca Street – Indonesia, right in the middle of the East-West shipping lanes, 10 km away from Jurong Island in Singapore, a country situated along the regional and international shipping route.

The Project plans to commission a total storage capacity up to one million cbm, or only about 6.4% increase in the total Merchant Terminal capacity available in Singapore (11.8 million cbm) and Indonesia (3.8 million cbm) together.

POWER PLANT

RENEWABLE ENERGY

NEW SEGMENT

PT PP Energi envisions IPP investment on thermal power plant of more than 10,000 MW and concern it as a core for growing business fields. Currently, PT PP Energi is taking part of 1014 MW thermal power plant into their IPP portfolios.

Moreover, PT PP (Persero) Tbk as holding of PT PP Energi has contributed to national electricity infrastructure and generated more than 2.8 GW since 2011.

Indonesia aims to increase the sustainable energy system for renewable energy and has set an overall target to have modern renewables provide 23% of total primary energy supply (TPES) by 2025, and 31% by 2050.

Therefore, PT PP Energi has the commitment to contribute their renewable energy investment into specializes for Hydropower, Solar Power, WtE (Waste- to-Energy), Biogas, CHP (Combined Heat & Power).

PP Energi intends to develop Technology that enabled Business platform (Online Marketplace for B2B/B2C business) to be customized suiting upcoming PP Energi business requirements and also help in automating routine processes for improved monitoring, control and scalability.

Furthermore, that's where Easy Solar comes in as one of pioneer project in the online solar market platform in Indonesia which aims to make investing solar PV project both simple and transparent.

This mobile application will cover trade activities among all stakeholders (technology selection, installation and purchasing with variant of payments) and sustainability performance by continuing solar usage analysis within the application.
